Trailer of  
“Picture a Scientist”

Today, women make up less than one quarter of all those employed in STEM occupations in the United States. These numbers are much worse for women of color who made up slightly less than 10% of working scientists and engineers in the United States in 2015. Science is supposed to be built on objectivity, and yet, most researchers agree that these bleak numbers are evidence of deep bias. Over the course of careers, small slights add up to prevent many women from achieving leadership positions in STEM fields. And sometimes, tragically, brilliant women drop out altogether. But now, the terrain is shifting...
