

HAYABUSA 2

Ryugu Sample Display Exhibition

Hayabusa2 successfully returned a capsule containing samples collected on asteroid Ryugu to Earth in December 2020. These asteroid grains are mostly studied by scientists in Japan and around the world. They expect to understand origins of life on Earth by studying these grains. A sample grain from the asteroid will be on display for Tech Tech students and faculty.

Exhibition date / hours: October 30th - November 1st, 2023 / 10:30 ~ 16:30

※Open to Tokyo Tech students and faculty only

Student ID or faculty ID needed to enter the museum

Venue: Tokyo Tech Museum (Centennial Hall) 2nd floor, Special Exhibition Room

Organiser: Earth-Life Science Institute (ELSI) and Tokyo Tech Museum

Cooperation: ISAS, JAXA
