Graphic Facilitation

Facilitator: T. Ishibashi

Graphic Facilitation is a technique used to visually represent the content of meetings or workshops. By discussing topics while visualizing them, meetings and workshops become more productive. The resulting outputs are structured and adorned with illustrations and various colors, making them useful for reflecting upon after the event and for sharing information with those who were absent. While it might seem that these techniques are suited for those with advanced drawing skills, anyone can acquire these skills. It will become a lifelong skill. In this class, we offer the opportunity to experientially learn the basics of graphic facilitation and specific visualization techniques.

【Date etc.】

20/JAN (Sat) 10:00-17:00

@Room S4-202, Ookayama

Although any of Tokyo Tech students, graduates or undergraduates, can apply the program, we will stop accepting applications once all the seats are taken.
