

# "Future Foresight" Workshop (Series of classes)

Facilitators: Awata·Matsuki·Fujimoto/Future Design Lab., The Japan Research Institute, LTD.

It is not just "Design Thinking"! The methodology of "Future Foresight" spread in Europe and the United States as a way of thinking about future prediction and uncertainty management in the VUCA era. In Japan, "Future Foresight" is being used by many private companies, government and local governments as a methodology which may take different approach than "Design Thinking". By using horizon scanning methods that capture the signs of uncertain change and forced thinking (brainstorming), we will proactively design the future in 10-15 years from now that nobody has yet conceived. In this class, you will experimentally learn how to use Future Foresight as a thinking tool for this purpose through 4 classes in Jan-Feb/2024.

**[Date & Time etc.] (Series of 4 classes)**

- #1 **29/JAN (Mon) 18:00-20:00**
- #2 **5/FEB (Mon) 18:00-21:00**
- #3 **10/FEB (Sat) 13:00-18:00**
- #4 **11/FEB (Sun) 13:00-18:00**

**@Room S4-202/TBD, Ookayama**

Although any of Tokyo Tech students, graduates or undergraduates, can apply the program, we will stop accepting applications once all the seats are taken.
