Systemic Design WS (1-day)

Facilitator: Y. Iimori / CEO, Digital Surf Co., Ltd.

【Workshop Theme】
(tentative) Thinking about sustainable "potato chops" using systemic design

I'm sure there are many people who like potato chips. Do you know, however, "potato chips" are made from palm oil. It is said to be one of the biggest causes of tropical deforestation, and not only that, but the problems associated with palm oil production are connection with world serious problems including forest fires, global warming, human rights violations, and labor environment issues. Since 100% of palm oil to be consumed in Japan are imported, Japan is required to take immediate action as a consuming country.

Although any of Tokyo Tech students, graduates or undergraduates, can apply the program, we will stop accepting applications once all the seats are taken.

Event for "Tokyo Tech SPRING" students

【Date etc.】
13/JUL (Sat) **10:00-18:00**
@S4-202, Ookayama
