

Glocal Summer School Program 2019 in Tokyo Tech

Design for Humanity - Eat to Delight - Application Guide

A 3-day intensive training program in problem solving and creative idea to solve world-scale problems for approximately 40 graduate school students from doctoral and master's degree programs, and professional master's degree program and individual workers, with different academic or professional background.

“Glocal” is new internationalization viewpoint that develops an excellent technology and idea from a local scale to a global scale.

This program, titled “Design for Humanity: Eat to Delight,” focuses on delight of eating for anyone at any age and how to develop an individual's invention to worldwide innovation.

Participating graduate students from doctoral and master's programs in mixed group, through discussions, activities, modeling, and poster presentation, can acquire the ability of leadership, interdisciplinary knowledge, and communication, to not only lead a team as a researcher or an entrepreneur but also create a collaboration, establish networks with researchers in other specialties, understand the extraprofessional knowledge and a new viewpoint by cultural exchange.

On the final day, each team will participate in poster presentation. Teams with reasonable proposals will receive an award.

This summer school program is coordinated by the staff of Tokyo Tech who worked as coach at the Imperial College London Tokyo Tech Global Fellows Programme in 2018, 2019.
