What is the Tokyo Tech Academy for Leadership (ToTAL)?

Excellence program for leadership development, open to a select group of students aspiring to create new values by fully utilizing their expertise in a synergistic, global environment

Three fundamental skills nurtured at ToTAL

Features

- ① Students with high aspirations inspire each other and engage in synergistic growth, transcending School, culture, and age differences.
- ② Interaction with individuals from diverse sectors in society allows students to gain new perspectives on the world.
- ③ Students can test their leadership skills acquired at ToTAL by participating in the Off-campus Project.
- ④ Completion of the program will be stated on the diploma.
- ⑤ Financial support is provided in the form of expenses for the Off-campus Project, tuition exemption, and scholarships.

Student Reflections

Chihiro Sano

Graduate Major in Human Centered Science and Biomedical Engineering,
Department of Information and Communications Engineering,
School of Engineering

I learned about ToTAL when I was not able to find what I wanted to accomplish. Many students in ToTAL are pursuing their dreams and aspirations, and I thought I might be able to find my own dreams by interacting with those people. I also found it interesting that we could build an organization by ourselves as the first cohort of ToTAL. Leadership, for me, is thinking to act for someone else other than yourself. Creating a comfortable environment for team members, or developing a high usability application – although their forms are different, I consider these to be both skills of leadership.

Kotchakorn T. Sriwong

Graduate Major in Life Science and Technology,
Department of Life Science and Technology,
School of Life Science and Technology

I have experienced being a leader before. I found it tough to move the team forward without friction. In the past, I was unable to solve several problems and to find the cause of those particular issues, but what I learned from ToTAL has made me gradually understand the problems I was confronted with. Leadership is a skill that enables people to influence others into actions that have a positive impact on society. Leadership also includes the ability to manage and oversee the smooth running of things. I hope in the future I will see myself as a better leader than before.
