

# Science and Technology for Health Care and Medicine graduate major : registration for courses offered in the medical and dental sciences

The core courses of the Science and Technology for Health Care and Medicine graduate major standard curriculum include courses offered in the medical and dental sciences fields. However, those courses differ from science and engineering courses in a few ways; keep the following distinctions in mind when planning what courses to take

## 【Major differences between courses offered】

|                                                 | Science and Engineering                                                           | Medical and Dental sciences                                                                                                                                   |
|-------------------------------------------------|-----------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Schedule                                        | Fixed<br>(Except for intensive courses lectures and research seminars)            | Irregular<br>The same course may be held on various periods or days of the week) (Please make sure to check the syllabus carefully before attending classes.) |
| Semester Break                                  | Quarter system                                                                    | Semester system                                                                                                                                               |
| Class Format (terms may vary)                   | In-person (Ookayama, Yokohama campuses), livestream, on-demand, hybrid, high-flex | In-person (Yushima Campus), Remote classes (Live, on-demand classes)                                                                                          |
| Learning Management System                      | Science Tokyo LMS                                                                 |                                                                                                                                                               |
| Syllabus                                        | Science Tokyo シラバス                                                                | Dream Campus                                                                                                                                                  |
| Course Registration Procedure                   | <u>Course Registration function</u> in the Web System                             | <u>Survey function</u> in the Web System                                                                                                                      |
| Course Registration Period (Fall Semester 2026) | 9/28(Mon)～10/17(Sat)                                                              | <u>Currently Enrolled Students : 9/7(Mon) – 9/10(Thu)</u><br><u>September Entrants: : 9/28(Mon)–10/1(Thu)</u>                                                 |
| Course Addition                                 | Permitted during the designated period                                            | <u>Generally not permitted</u>                                                                                                                                |
| Course Cancellation                             | Permitted during the designated period                                            | <u>Generally not permitted</u>                                                                                                                                |

## 【Registration for medical and dental sciences courses】

- Note that you may only take the courses listed in the core courses of the Study Guides for Science and Technology for Health Care and Medicine. Academic units or major codes are listed in the “Notes” or “Comment” column.
- As a general rule, registration for Medical and Dental Sciences courses cannot be cancelled after submission.
- Please be sure to check the syllabus for the Medical and Dental sciences courses to ensure that their class schedules do not conflict with those of the Science and Engineering courses you plan to take. Please refer to the 2026 academic year syllabi and check the class dates and times under “Class Schedule” → “Class Details.”
- [医歯学系科目シラバス検索サイト](https://yushima2.tmd.ac.jp/portal/Public/Syllabus/SearchMain.aspx) (Dream Campus)  
<https://yushima2.tmd.ac.jp/portal/Public/Syllabus/SearchMain.aspx>
- Courses for which you have completed the survey will be reflected in the Web System by the time of course registration for science and engineering courses.

## 2026年度後期 人間医療科学技術コース医歯学系開講科目 時間割

### ◆留意点/Notes

・対面授業および期末試験は、原則、授業開講元(医歯学系)のキャンパスで実施します。

In principle, face-to-face classes and final examinations will be held on the campus of the Medical and Dental Sciences where the course is offered.

・原則、医歯学系科目の履修取消はできません。

Please note that the registration for Medical and Dental Sciences courses cannot be canceled.

・博士後期課程学生も、履修人数等に余裕があれば400番台科目の履修は可能ですが、修了要件の単位には含まれません。

For doctoral students, credits earned from 400-level courses cannot be counted as required credits for completion of the program.

・授業スケジュールは医歯学系シラバスの「授業明細」で確認してください。

Please check the Course Schedule in the "Course Schedule Details" of the Medical and Dental Sciences Syllabus.
