【Doctoral Degree Program】

1. Outline

The Doctoral Program of the Graduate Major in Social and Human Sciences creates leaders who can lead the world in the further development of society through science and technology based on specialized academic research in close collaboration with studies of people, society, and science and technology; who create new value, and who resolve human and social issues caused by science and technology.

The ideal candidates are:

- Those who have a broad knowledge of the humanities, social sciences, and science and engineering, and advanced expertise in fields related to people, society, and science and technology;
- Those who have the communication skills necessary for connecting people, society, and science and technology, and those who understand diversity, humanities, and the importance of being able to connect society with science and technology;
- Those with value-creation skills that enable them to form advanced evaluation criteria independently and demonstrate their vision;
- Those with problem-solving skills enabling them to creatively design the necessary structures and push forward with the implementation of those structures;
- Those with the ambition to be successful in a global society as a leader with value-creation and problem-solving skills, capable of pioneering and leading the frontier where science and technology merges with humanities and social sciences;
- Those with the eagerness to acquire the ability for specialized academic research in close collaboration with related studies, and the willingness to put one's value-creation and problem-solving skills in to practice.

2. Competencies Developed

In this program, students will acquire the skills such as:

- A broad knowledge of the humanities, social sciences, and science and engineering;
- Advanced expertise in fields related to humans, society, and science and technology;
- Critical analysis and integration ability, interdependent relationship-building ability, and the ability to initiate and be active in dialogues involving multiple fields and cultures;
- Understanding of diverse knowledge structures, values, and world views;
- High ethical perspective, sensitivity, flexibility, sense of responsibility, and positivity;
- Ability to have insight, reflect, and translate;
- Value-creation skills enabling one to form advanced evaluation criteria independently and demonstrate one's vision;
- Problem-solving skills enabling one to creatively design the necessary structures and push forward with the implementation of those structures;
- Ability to conduct specialized academic research in close collaboration with related studies;
- Ability to put one's value-creation and problem-solving skills in to practice.

3. Learning Goals

The department offers the educational program for the following purposes to allow students to master the above-mentioned skills:

A) A broad knowledge of the humanities, social sciences, and science and engineering and advanced expertise in fields related to humans, society, and science and technology such as Politics, Law, and Administration; Education, Welfare, and Health; Culture and Art; Science, Technology and Society; Cognition, Mathematics, and Information, through Research Seminars, Courses for Common Project Dialogue Dispatch, Courses for Training Support Career, courses in specialized fields, and Liberal Arts and Basic Science Courses.

B) Critical analysis and integration ability, interdependent relationship-building ability, and the ability to initiate and be active in dialogues involving multiple fields and cultures through Research Seminars, Courses for Common Project Dialogue Dispatch, Courses for Relationship-building, Courses for Training Support Career, courses in specialized fields, and Liberal Arts and Basic Science Courses.

C) Understanding of diverse knowledge structures, values, and world views through Courses for Common Project Dialogue Dispatch, Courses for Relationship-building, Courses for Training Support Career, and Liberal Arts and Basic Science Courses.

D) High ethical perspective, sensitivity, flexibility, sense of responsibility, and positivity through Courses for Common Project Dialogue Dispatch, Courses for Relationship-building, Courses for Training Support Career, and Liberal Arts and Basic Science Courses.

E) Ability to have insight, reflect, and translate through Research Seminars, Courses for Common Project Dialogue Dispatch, Courses for Relationship-building, Courses for Training Support Career, and Liberal Arts and Basic Science Courses.

F) Value-creation skills enabling one to form advanced evaluation criteria independently and demonstrate one's vision as well problem-solving skills enabling one to creatively design the necessary structures and push forward with the implementation of those structures through Research Seminars, Courses for Common Project Dialogue Dispatch, Courses for Relationship-building, Courses for Training Support Career, and courses in specialized fields.

G) Ability to conduct specialized academic research in close collaboration with related studies through Research Seminars, Courses for Training Support Career and courses in specialized fields.

H) Ability to put one's value-creation and problem-solving skills in to practice through Research Seminars, Courses for Common Project Dialogue Dispatch, Courses for Training Support Career, and courses in specialized fields.

4. IGP Completion Requirements

The following requirements must be met to complete the Doctoral Degree Program of this major.

1. Attain a total of 24 credits or more from 600-level courses.

2. Fulfill requirements in Table D1 below.

3. Pass the doctoral dissertation review and defense.

Table D1 shows course categories and the number of credits required to complete the Doctoral Degree Program of this major. It also shows the required minimum credits in each course category and points to be noted when selecting the required courses and electives.

The learning goals to be obtained by students through courses are listed as "associated learning goals". Prior to registering courses, students need to fully understand the course goals.

Note :

• ◎ : Required course

• Competencies: 1 = Specialist skills; 2 = Liberal arts skills; 3 = Communication skills; 4 = Applied skills (inquisitive thinking and/or problem-finding skills);   5 = Applied skills (practical and/or problem-solving skills)

• The character preceding the three digits in the course number denotes the course's subdiscipline (i.e., "D" represents the subdiscipline code in the course number ABC.D600.R): P (Politics, Law, and Administration); D (Education, Welfare, and Health); U (Culture and Art); S (Science, Technology and Society); M (Cognition, Mathematics, and Information)

6. IGP Courses That Can Be Counted as Humanities and Social Science Courses

None

7. IGP Entrepreneurship Courses and IGP Courses That Can Be Counted as Entrepreneurship Courses

In order to fulfill the completion requirements for the doctoral degree program, students must attain at least four credits in Entrepreneurship Courses, and should satisfy all of the Graduate Attributes (GAs) specified in Table D-1 of the "Entrepreneurship Courses" listed as "Liberal Arts and Basic Science Courses" in the Guide to Graduate Education and International Graduate Program, as well as shown below. Students will be evaluated in regards to GA achievements at the time of their degree completion. For courses with two GAs, both GAs stipulated for the courses are considered to be acquired if students attain the corresponding credits for those courses.

Entrepreneurship Courses and Major Courses that enable students to acquire GAs and are recognized as equivalent to Entrepreneurship Courses, offered by the Graduate Major, are listed in Table D3 below. Students can also acquire GAs and credits by taking the Entrepreneurship Courses offered by the Center for Entrepreneurship Education (CEE) listed as "Liberal Arts and Basic Science Courses" in the Guide to Graduate Education and International Graduate Program.

As there are some Entrepreneurship Courses without GAs, please check carefully before registering for them.

However, it must be noted that credits attained from courses that are recognized as Entrepreneurship Courses can be counted towards the completion requirements of the doctoral degree program, either for Major Courses or for Entrepreneurship Courses (not for both). Nevertheless, even in cases where credits pertaining to courses that are not considered as Entrepreneurship Courses are attained, the associated GAs may be considered by the Graduate Major to have been acquired.

> For Graduate Attributes, refer to the Guide to Entrepreneurship Courses.
>
> The Graduate Attributes of the Doctoral Degree Program are listed in Table D-1 as follows:
>
>   GA0D: You can clearly design your own career and contribute to realizing scientific, technological, or social innovation through a comprehensive understanding of the knowledge, skills, social responsibilities and ethics required to become an active member of academia and/or industry.
>
>   GA1D: You can lead in realizing scientific, technological, or social innovation by acquiring advanced leadership skills, entrepreneurship, knowledge and expertise, and by developing social responsibility necessary for materializing your designed career.
