

Humanities and social science courses

Among issues happening in the real world, there are no issues that can be solved by only one academic discipline. In order to make use of your specialized knowledge in everyday life, no matter how advanced your knowledge is, you have to have practical abilities such as taking leadership through involving with others, having holistic view about the position of your expertise in the world of academia, and acquiring knowledge about social and cultural backgrounds of many areas of the world. Our humanities and social science courses in the Master's degree program aim to foster these practical abilities and knowledge with "Humanity", "Social Skills" and "Creativity" at the core. The classes themselves are valuable opportunities to interact with students who have different academic backgrounds.
