For graduate students enrolled before Academic Year 2021

Clarifications regarding GAs (Graduate Attributes) for career development courses from Academic Year 2022

Important information on the change of GAs:

The GAs for all the career development courses, including for department-offered courses that can count as career development courses, have been changed from the beginning of AY 2022.

Master's and Doctoral students enrolled before 2021 who have earned credits for career development courses (including for department-offered courses that can count as career development courses) in 2022 or later are considered to have acquired the "original GAs" as shown in the right column of Table 1 below.

In addition, the original GAs will also be applicable to doctoral students according to their selection of either ALP or PLP. This is because master's and doctoral students enrolled before AY 2021 will continue to hold the original GAs without any change, for the career development courses they took before AY 2021, until they complete their graduation requirements. This will reflect accordingly on grade transcript and official certificates that confirm the completion of graduation requirements. All students can confirm their grade information or completion requirements information by themselves through the WEB system for Students and Faculty.

Table1: Relation between new and original GAs

	New GAs assigned to career development courses from AY 2022	Original GAs acquired by students enrolled before AY 2021
Master's Program	GA0M	C0M
	GA1M	C1M
Doctoral Program	GA0D	A0D, P0D*
	GA1D	A1D, A2D, A3D, P1D, P2D, P3D*

*According to student's selection of either ALP or PLP
